BAY TEAM PARENT SURVEY

The BAY Team distributed surveys to parents who attended the Barrington High School Open House on September 17, 2015 and the Barrington Middle School Open House on September 30, 2015.

Completed surveys were entered into a database. Frequencies were calculated for all items and the actual N is reported for each figure.

RESULTS

Total number of participants who completed the survey is N = 279 (nBMS=139 and nBHS=140). In the following figures, the total number of responses may not match the total number of participants due to missing responses. Reported percentages are out of the total number of valid responses for the particular question and are rounded.
