The Snowman is a charming British animated short film based on the classic children's book by Raymond Briggs. Young children will be entranced by the story of a small boy in rural England whose lovingly constructed snowman comes to life and takes him flying over the white-blanketed landscapes, in a beautiful sequence based on live-action flying footage. Part of the charm of the film is the gentle, everyday quality of its fantasy adventures. The snowman is invited in to try on clothes and play with the toys and household items, then plays host to the boy at a party in the woods. This is a very special movie that deserves to be a holiday perennial, a kindhearted fable of friendship and the power of imagination.

Father Christmas breaks from tradition as Santa decides to convert his sleigh into an airborne motor home for a vacation. He finds France too snooty, Scotland too cold, and Las Vegas just right. Tanned and rested, he returns to the North Pole in time to sort through the mail, pack up the toys, and hit the skies. Like the Santa of the Raymond Briggs book, he narrates his own story. - Kimberly Heinrichs
